Projects

Tmreen

- Trainer create the exercises by these exercises the trainer makes the workout of the day and and by combining these workouts of multiple days he creates the program and sell them to user. The user will buy the program.

LuxIPS

- Here user's Transactions, holdings and securities are fetched from the plaid api, classify them and then using formulas we count the total gain loss, income, withdrawals etc.

Wishkeeper

- Wishkeeper is your safe Place to store all the important things that have happened in your life, your plans for the future, letter to loved ones, how you'd like to be remembered and so much more.

Finch Films

- This is for film industry where user can buy different products for the shooting on rent. Billing is done after the return of the products and if products are damaged then extra charge is added.

Notetify

- Institutions can sign-up and after approval they can send invites to the members. After member logins they can add them to the groups to sell the products.
