

ANURAG JOSHI

SOFTWARE ENGINEER

Passionate full-stack engineer with hands-on experience in designing, developing and maintaining web as well as mobile applications. Understands and manages stakeholder needs and translates them to technical requirements. Manage and prioritize projects along with miscellaneous business requests for the team to ensure deadlines are met.

Looking forward to obtaining a team lead position where my experience and technical skills will help in managing and mentoring the work of developers and finish projects within deadlines.

WORK EXPERIENCE

Associate Developer

Tech Anand Rathi - ARIT

April 2021 - Present

- Led team of developers / trainees towards successful project accomplishments and Coaching, monitoring, and training teammates.
- Gathering all the user requirements, then preparing estimation sheets with tasks for upcoming sprints, getting approvals from business users for estimated development time, Story and tasks/sub-tasks distribution and tracking using JIRA, and daily Scrum meetings for transparent communication with business users.
- Analyzed, monitored, reviewed, and improved applications performance and satisfaction with preparing reports, manuals, and documents for operation and maintenance of apps.
- Coordinated with the quality assurance team to follow standard protocol for development and SIT, UAT and PROD issues resolutions.
- Developed reusable pixel-perfect responsive type-safe components for ReactJS web apps and react-native cross-platform mobile apps.
- Developed Back-End APIs in NodeJS and Python Fast API framework for automated processes using several command-line tools.

PROJECTS

SELF-BRANDED AUTOMATION FOR ANDROID APPS: (LIVE)

Designed, developed and maintained automation processes for generating self branded android applications. There are the following processes developed using Python Fast APIs:

- Generating New Self Branded apps on the users requests.
- Updating Existing Self Branded apps on the users requests.
- Updating OLD Self Branded apps(.jks format keys) on business user requests.
- Currently developing a combined Self Branded API with UI for business users.

OFA CLIENT:

Developing Cross-Platform React Native Mobile Application for mutual fund investors to track and monitor their mutual fund schemes, request for portfolio reports, view transaction details, know upcoming SIPs and much more. This app is only restricted to those clients whose MFDs are registered users of OFA Plus.

EMPLOYEE BENEFITS PLUS AND PROTECION DYNAMICA (LIVE)

React Native Cross-Platform Mobile Application for all your Employees benefits & wellness needs. I worked with the Anand Rathi Insurance Brokers Limited team and created this application for Employee benefits & wellness worries with enrollment & claims analytical reports at employees fingertips, claims tracking, search nearest network hospitals and download E-card & other useful documents.

Protecion Dynamica is a Cross-Platform, Multi-Language application Developed for the Anand Rathi Insurance Brokers Limited's Mexico Client. It was also an app created for Employees benefits.

COURIER SERVICE WEB APPLICATION

A Complete Courier service web application having full control of all the administrative levels. Safe and secured, track and hierarchy based project with Inward, Outward, Delivery, Bill, Payment, Reports and Master modules.

- Developed Several web pages with responsiveness using Material UI.
- Implemented Dynamic enhanced routing using react-router-dom.
- Created Fully Functional REST APIs for several modules.

ACHIEVEMENTS

1. Quarterly Award and Certification in recognition of excellent performance at ARIT.
2. Independently Delivered Self branded Automation project, Live.
3. Benefit Plus Cross-Platform React Native Application, Live at Play Store and App Store.
4. Selected to represent my project at JIET in "Internal Smart India Hackathon" in 2020.
