**Project Name : Safe Eye**

**Project Detail:** The goal of the Safe Eye mobile app is to deliver an emergency panic call application for society. The users of the app will be able to make a distress call by pressing a panic button or by voice command, the location of the distress will be sent on the emergency contacts and the location of the distress will be visible to the nearby users of the Safe Eye. The distress will be able to live stream the video of the situation, live track the nearby users reaching to them, able to record the audio of the situation and send it to the emergency contacts. The witness of the situation will also be able to access the features similar to the distress..

**Project Name : Part Wit**

**Project Detail:** The goal of this application is to develop a platform through that users can connect, trade, promote services, donate any legal item, or quite simply parting With (Wit) or receiving part of any good or service.

**Project Name : Lazy Calendar**

**Project Detail:** The goal of this application is to create a platform where people can add events by uploading or taking photos. The app allows you to select the information you need from the photo and then transfer it to an electronic calendar. The user saves these events on the app and syncs the events with iCalendar and Google Calendar

**Project Name : Socialite**

**Project Detail:** The goal of this application is to provide a platform where content creators can link their social media accounts, upload a short video that showcases their content, and create polls/questionnaires to engage with their followers. Fans will be able to follow their favorite creators on the app and engage with the polls/questionnaires that they post. Creators can also grow their audience on the app by gaining new followers through the Suggested Creator feature.

**Role:** Tester

**Development Tools, Technology & Services Used:**
