## PROJECTS

### My Bill Wallet

- This project is based on saving the customer's details like documents coupons and other bill details in this I work on login with a fingerprint sensor and face detection..

### AARA Inventory

- In this module, the user can scan the QR code with a QR code scanner and save the information of that product in the cart and purchase it.

### AVPL APP

- This is an e-commerce application where the user can buy products for daily essentials in this module I implements google maps and rezorpay module and also user can see the nearby store and can purchase from there.

### Rward-dragon super-admin Panel

- This is the reward-dragon super-admin panel by which the admin has the access to add the client rejects the client and can upload games and videos which can reflect on the application also can have the details and have the access to recharge the client's wallet through this super-admin panel.

### School ERP

- In this application, the parents can get an update on their child's marks and see their child's performance from the app and the teacher can assign and student can upload their assignments.

### Buguda User and Driver Application

- In this application, Users can get information about their nearby places through this application in which the people can see where the nearby amenities and hospitals in this application by clicking on the direction the app shows the direction with the help of google maps which the user can travel there.

### AARA ERP

- This is ERP where i design all UI screens in this ERP on reactjs and tailwind CSS
