

B2B Tobacco Application/Website

Adjustments on Messages:

- You must ensure that the message system is the same as the WhatsApp one.
- What I mean by that is you need to:
 - -Make the conversation go Automatically without needing to refresh and go out of the message.
 - -Red light and Green light in case of reading and unread need to happen automatically.
 - -Sending videos and pictures smoothly {the same as WhatsApp}
 - -When someone is typing to reply the "TYPING" word appears on the screen {Same as WhatsApp}.
