## WORK EXPERIENCE

### Software Developer Dev Technosys Pvt. Ltd.

01/2021 - Present

Jaipur

#### Achievements/Tasks

- Responsible for developing mobile application in ios and android.
- Working in redux and context Api for state management in app for better api integration.
- Experience in building multi-language app and e-commerce projects.
- Integrated third party authentication such as google, facebook, apple and experience in push notification implementation and in-app purchases in application.
- Integrated In-App Purchase in React Native in both IOS and Android

## PROJECTS

### AIE - Online exam platform (04/2022 - Present)

- This project is based in React.js which has two panels - admin panel and student portal.

### Travel Share (11/2021 - 05/2022)

- This project is based on sharing travel experience and surfing the trips around the world posted by other users and admin.
- Users can also have chat in the app for planning the trips remotely in groups or with in two person.
- This app uses socket.io library for the chat section which is managed perfectly in front end and backend side in Node.js

### Symphony of the Cells (08/2021 - 04/2022)

- This app is related to provide information regarding medical information like generic medical solutions and natural herbs.
- This app also has the In-app Purchase integration through google and apple.

### NomNomVroom (04/2021 - 02/2022)

- This is Dinning and Food vendors locator app, where user can find the vendors in nearby filtered radius with current location.
- The vendor part has more functionality like first purchasing the plan through In-app purchase in android and ios and also integrated webhooks in subscriptions.
- This app also has social login and register authentication like google, facebook and apple. This app is also available on google play store.

### Come and Save (01/2021 - 04/2021)

- This project is available on app and play store and this was part of my current job where hitarth is responsible for developing mobile app in react native tech stack and this project purpose is to give discounts to the users basis on their frequent usage of the app. This app displays the restaurants based on the user's locaion.

## EDUCATION

### Bachelor in Computer Application JECRC University

07/2017 - 05/2020

Jaipur
