WORK EXPERIENCE

12/2021 – Present NOIDA , INDIA
ALGOWORKS
REACT NATIVE DEVELOPER

I have worked on 3 to 4 projects till now, some of them are a Dating app, a Stock market app, a fitness-related app, a Digital business card sharing app, and currently working on a Moter bike/parts selling app.
Features: *QR code scanner, deep-linking, OCR(text detection from image), signal R API, Social media login, Firebase, one-to-one chat, SMS sharing, etc*
App store and Play store link:
Stock market app:
Android: *https://play.google.com/store/apps/details?id=com.blackboxstocks.mobile*
iOS:*https://apps.apple.com/in/app/blackboxstocksmobile/id1529902887*
Digital business card sharing app:
Android:*https://play.google.com/store/apps/details?id=com.EmeraldStrategyGroup.BusiCard*
iOS:*https://apps.apple.com/in/app/busicard/id1558701269*

09/2020 – 12/2021 DELHI , INDIA
DIGITAL AGENTS INTERACTIVE PVT. LTD.
MOBILE APPLICATION - SOFTWARE DEVELOPER

Worked as React Native developer and made 3 to 4 projects for the clients like Mitsubishi, Hershey's, Kellogg's, Dell, etc.
1. *The application is used for internal use of the client company which helps clients employees to understand the Policies, codes of conduct, etc of the company.*
2. *We have implemented AWS analytics, firebase for login, Push notification functionality in each application, Realm to store data locally on mobile devices, and AWS S3 bucket to store data on AWS server.*

07/2019 – 09/2020 COIMBATORE , INDIA
WIPRO LIMITED
PROJECT ENGINEER

I have worked on the SAP technology tool to provide the access to the users on system and push the role from the developer to the production line. Then I have started working on React native and keep exploring it.

PERSONAL PROJECTS

UBER CLONE (04/2020 – 05/2020)
Passenger and driver functionalities. Added anonymous login/signup. Passenger can book a ride, driver gets the nearest passengers details including their location.
Used Parse server for managing backend, storing location for both passengers and drivers. Integrated Google maps and Geo location API fetching latitude and longitude of current location.

ONLINE SHOPPING (01/2020 – 03/2020)
Shopping app for groceries. Stores the user-specific database. The stock of the items is maintained and the history of the order could be observed. New addresses could be added. Used - Redux, Axios, React- native. Implemented in react-native. Integrated external libraries : Google Places (for fetching user address) , Integrated Facebook and Google SDK's , Firebase. Worked with API integration using Axios.

BLOG (12/2019 – 01/2020)
This app provide the user with an interface to read and add the blogs. Used context and provider for storing the data locally. Used react navigation for navigating through app. Used Provider for passing content information to child components in the application.
